

NU-FORM FIRE UK CASE STUDY

Key Project Criteria

Case Study Ref:	NFF-01
Project:	Carpetright
Value:	£ 1,000,000.00
Design Standard:	FM Global

500,000sq ft Carpet Warehouse Sprinkler Protected

Nu-Form Fire UK were awarded this contract following their successful completion of previous Carpetright contracts to the highest standard.

The warehouse, nicknamed 'Ultrabox', was the single largest speculative warehouse in the South of England, standing at over 1/2 million square feet.

The contract comprises full sprinkler protection at roof level, within offices and within the carpet racks themselves.

Providing the water supply for this installation is one of Nu-Form Fire's 'Pre-packaged Fire Pump houses' which is delivered to site, custom made in a 'ready to go' fashion and connected to the water storage tank erected on site.
